## Sustainability Strategy Ideas

Create a rewards system for active travel.

Audit local transport links and, if required, campaign to local government to have active travel routes to be made safer.

Task a team of Sustainability Champions with ensuring lights, computer screens, projectors etc. are turned off when not in use.

Look into green energy creation within the building. For example, could you install solar panels, a small wind turbine or other measures, to help offset carbon consumption.

Could insulation be improved or drafts removed to reduce heating costs?

Look into options for an electric car charging point to be installed in the car park.

Lead a discussion to assess where electricity might be being wasted and remind your peers to turn off and unplug devices when they are not being used.

Contact your STEAM Mentor to discuss additional carbon reduction strategies.

## Introduction Activity

We recommend consulting the Carbon resources from the \_\_\_\_\_ primary program for ideas on how to explore this topic.

Additionally, you could introduce the theme using this short activity:

## Careers Information

Below is a list of job roles associated with Carbon. Use internet search results, and [Jacobs.com](https://www.jacobs.com)
